

CareerConnect – Product Requirements & Testing Report

Project Information

Project Name: CareerConnect

Version: 1.0

Project Type: Web-Based Job Portal Platform

Technology Stack: Python, Flask, SQLite/MySQL, HTML, CSS, JavaScript, Bootstrap

1. Project Overview

CareerConnect is a centralized career management platform designed to help students and job seekers discover jobs, internships, and career opportunities from multiple sources.

The platform provides:

- Live Job Listings
 - Internship Opportunities
 - Job Search & Filtering
 - User Profile Management
 - Saved Jobs
 - Application Tracking
 - Company Directory
 - Notification System
 - Job Matching Engine
-

2. Objectives

Primary Goals

- Provide real-time job opportunities.
- Allow users to search and filter jobs efficiently.
- Track applications in one place.
- Save jobs for later review.
- Improve job discovery through personalized recommendations.

Target Users

- Students

- Fresh Graduates
 - Job Seekers
 - Recruiters
 - Placement Cells
-

3. Functional Requirements

Description

Users can register and log in securely.

Acceptance Criteria

- User can register.
 - User can log in.
 - User can log out.
 - Password validation works correctly.
-

FR-02 User Profile

Description

Users can manage their profile information.

Features

- Name
- Email
- Skills
- Education
- Experience
- Resume Upload

Acceptance Criteria

- Profile updates save successfully.
 - User information persists after logout.
-

FR-03 Explore Jobs

Description

Users can browse live jobs.

Features

- Job Title
- Company Name
- Location
- Salary
- Job Type
- Posted Date

Acceptance Criteria

- Jobs load successfully.
 - Pagination works correctly.
 - Apply button redirects correctly.
-

FR-04 Internship Portal

Description

Users can browse internship opportunities.

Acceptance Criteria

- Internships are displayed.
 - Filtering works correctly.
 - Applications are tracked.
-

FR-05 Job Search

Description

Users can search jobs using keywords.

Acceptance Criteria

- Search returns relevant jobs.
 - Empty search displays all jobs.
-

FR-06 Advanced Filters

Filters

- Location
- Role
- Job Type
- Experience
- Salary
- Date Posted
- Skills

Acceptance Criteria

- Filters update results correctly.
 - Multiple filters work together.
-

FR-07 Saved Jobs

Description

Users can bookmark jobs.

Acceptance Criteria

- Save job button works.
 - Saved jobs persist.
 - Saved jobs can be removed.
-

Description

Users can track applied jobs.

Acceptance Criteria

- Applied jobs appear in dashboard.
 - Application history is maintained.
-

FR-09 Companies Directory

Description

Display companies hiring on the platform.

Acceptance Criteria

- Company details load correctly.
 - Company profiles are accessible.
-

FR-10 Notifications

Description

Users receive updates regarding jobs and applications.

Acceptance Criteria

- Notifications appear correctly.
 - Notification count updates.
-

4. Non-Functional Requirements

Performance

- Page Load Time < 3 seconds
- API Response < 2 seconds

Security

- Password Encryption
- Session Management
- Input Validation

Availability

- System uptime target: 99%

Scalability

- Support 1000+ concurrent users

5. Test Cases

Authentication Testing

Test ID	Test Case	Expected Result	Status
TC001	Register User	User Registered	Pass
TC002	Login User	Login Successful	Pass
TC003	Invalid Password	Error Message	Pass
TC004	Logout	Session Ends	Pass

Profile Testing

Test ID	Test Case	Expected Result	Status
TC005	Update Profile	Saved Successfully	Pass
TC006	Add Skills	Skills Updated	Pass
TC007	Upload Resume	Resume Uploaded	Pass

Job Portal Testing

Test ID	Test Case	Expected Result	Status
TC008	View Jobs	Jobs Displayed	Pass
TC009	Search Job	Relevant Jobs Displayed	Pass
TC010	Filter Jobs	Correct Results	Pass
TC011	Pagination	Loads Next Page	Pass
TC012	Open Job	Job Details Open	Pass

Internship Testing

Test ID	Test Case	Expected Result	Status
TC013	View Internships	Internship List Displayed	Pass

Test ID	Test Case	Expected Result	Status
TC014	Filter Internships	Correct Results	Pass

Saved Jobs Testing

Test ID	Test Case	Expected Result	Status
TC015	Save Job	Job Saved	Pass
TC016	Remove Saved Job	Job Removed	Pass

Application Testing

Test ID	Test Case	Expected Result	Status
TC017	Apply Job	Application Recorded	Pass
TC018	View Applications	Applications Listed	Pass

6. Known Issues

1. Job Match Percentage calculation requires improvement.
 2. Responsive layout needs optimization for smaller screens.
 3. Some external jobs redirect to third-party sites (LinkedIn, Adzuna).
 4. MySQL fallback currently switches to SQLite when unavailable.
-

7. Future Enhancements

- AI Resume Analyzer
 - Resume Builder
 - AI Job Recommendation Engine
 - Real Application Tracking
 - Recruiter Dashboard
 - Company Verification
 - Interview Scheduling
 - Email Notifications
 - Mobile Application
 - Skill Gap Analysis
-

8. Project Status

Current Version: Stable Beta

Modules Completed:

- Authentication
- Profile Management
- Live Jobs
- Internships
- Saved Jobs
- Applications
- Notifications
- Companies Module

Overall Completion: 85%
